CLASSICSTONE
PAVERS & PRODUCTS

Creating a perfect space is all about blending the elements. Not everything can be a feature but everything should be beautiful. When choosing a paving product you need something that will harmonise not dominate your environment.

CLASSICSTONE

Classicstone Pavers & Products was established in Melbourne in 1995 and has quickly emerged as the industry leader for high quality manufactured concrete products.

The company philosophy is to always strive for excellence in the quality of the product and in service.

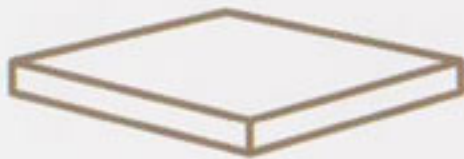

Never will quality be sacrificed for higher output, as Classicstone takes pride in the manufacturing process. Much of the processes are done by hand and only automated in areas that will improve the product.

A quality product deserves quality service and Classicstone is second to none in the industry.

Products and Colours

Classicstone products have a unique subtle sand texture and come in a range of natural colours that enhance all designs from the contemporary through to the traditional. All of the products we offer come in our entire colour range.

Our products are durable, comfortable underfoot, slip-resistant and easily maintained. Classicstone achieve this with a wet-cast production method that binds blended sands, granulated stone and colour pigments.

This also helps us achieve a natural feel and appearance.

Classicstone products are ideal for swimming pool surrounds, driveways, stairs, courtyards and indoor/outdoor areas.

Each item is made individually including all paving and coping products.

Pavers

Paving and accessories are available in the entire Classicstone colour range with no price variation on colour choices from our standard range featured here.

Colour and texture represented here are as close as printing process allows.

Coping & Accessories

All of our copers and architectural products have been engineered to meet the needs of leading industry designers and builders. All specialty products come in the entire Classicstone colour range and are manufactured to produce a unique texture that will achieve a superior finish.

Classicstone will suit any design and our copers help us achieve this. Our copers come in a round edge and square edge finish that will compliment the ultra modern through to the more classical.

For pools, spas, ponds and water features the canterbury moulding and the new square waterline tile were developed to be placed underneath coping to achieve consistency right through to the waters edge.
