

ANTIPAMINERALS

Big Assets + Leverage = Big Opportunity

Presentation

August 2012

Forward-Looking Statements

- This document may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning Antipa Mineral Ltd's planned exploration program and other statements that are not historical facts. When used in this document, the words such as "could," "plan," "estimate," "expect," "intend," "may," "potential," "should," and similar expressions are forward-looking statements. Although Antipa Minerals Ltd believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements. Readers should not place undue reliance on forward-looking statements.

Investment Decisions

- Before making an investment decision relating to Antipa Minerals Ltd, you should consider, with or without the assistance of a financial adviser, whether an investment is appropriate in light of your particular investment needs, objectives and financial circumstances. Past performance is no guarantee of future performance.

Distribution of this Document

- The distribution of this document in jurisdictions outside Australia may be restricted by law. Any recipient of this document outside Australia must seek advice on and observe any such restrictions.

Competent Persons Statement

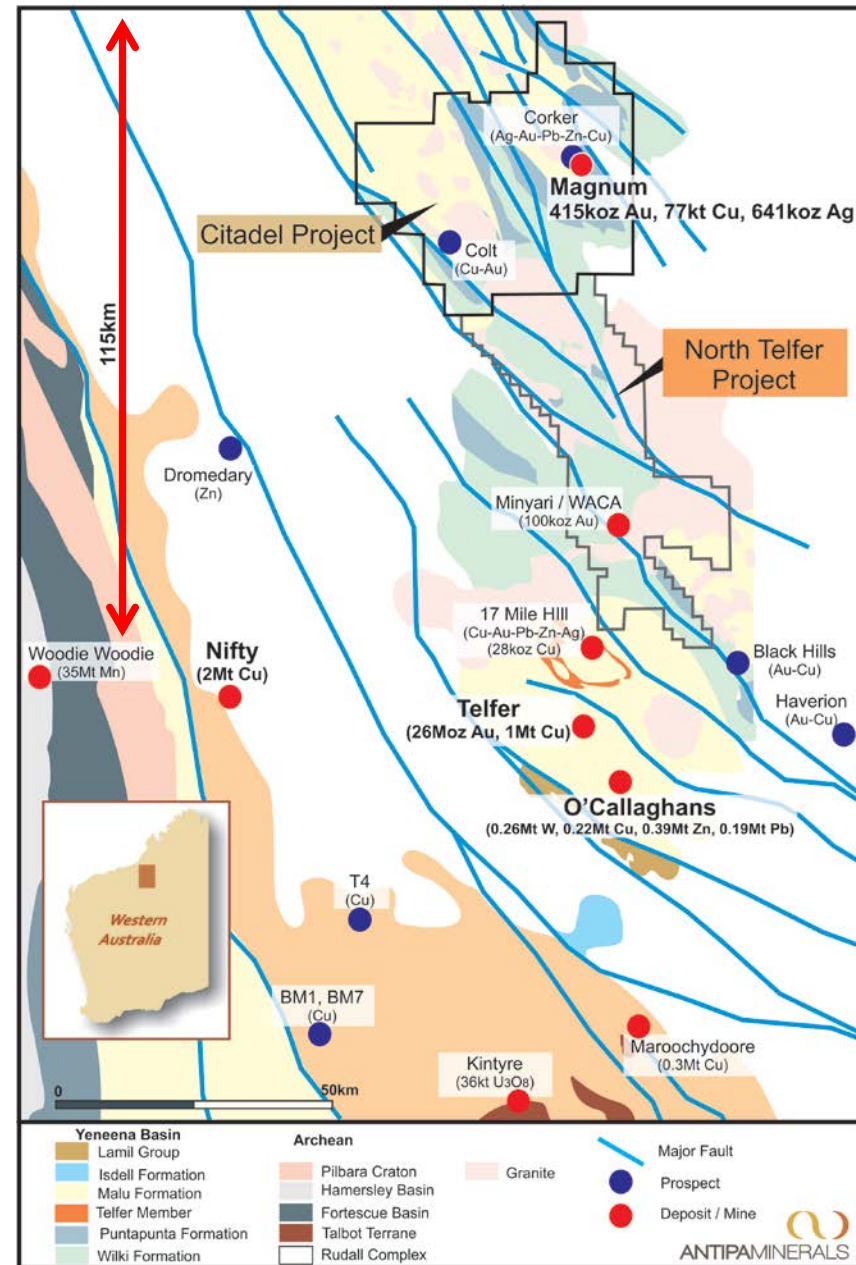

- Unless otherwise specified, the information in this document that relates to Exploration Results is based on information compiled by Mr Roger Mason who is a full-time employee of the Company and is a member of the Australasian Institute of Mining and Metallurgy. Roger Mason has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Roger Mason consents to the inclusion in the document of the matters based on his information in the form and context in which it appears.

Other Important Information

- This document is not a prospectus under the Corporations Act 2001 (Cth) and has not been lodged with the Australian Securities and Investment Commission (ASIC). All dollar values in this document are in Australian dollars (A\$), unless otherwise stated. Antipa Minerals Ltd makes no representation or warranty, express or implied, as to the currency, accuracy, reliability or completeness of any information, statements, opinions, estimates, forecasts or other representations contained in this document. Antipa Minerals Ltd takes no responsibility for any errors or omissions from this document and to the fullest extent permitted by law disclaim all and any liability for any loss arising directly or indirectly, as a result of reliance by any person on this document.

Big Assets + Leverage = Big Opportunity

- Experienced and dedicated team with proven track record
- Exploring for big mineral deposits
- Largest granted tenement holder in the highly prospective, under-explored Paterson Province
- Proof of exploration concept and strategy – still early days
- First mover advantage (new generation geophysics)

Capital Structure (15 August 2012)

Ordinary Shares 57.3 million

Restricted Shares 21 million

Options 46.3 million

Current Share Price A6.5c

Market Capitalisation A\$5.1 million

12 Month Share Price Range - A26.5c – A4.4c

Debt Nil

Cash (30 June 2012) A\$2.5 million

Background & History

Listed on ASX 19 April 2011 following successful completion of A\$10 million IPO

Citadel Project acquired from Centaurus Metals in April 2011 for shares/options upon completion of IPO

North Telfer Project priority application lodged, pursuant to an agreement with Paladin Energy

Major Shareholders

Centaurus Metals 8%

Directors/Management 26%

Top 20 49%

AZY Share price Performance – 12 months

Stephen Power, LLB - Executive Chairman

- Commercial lawyer with 25 years experience advising participants in the resources industry in Australia and overseas including Africa and South America. Non-Executive director of Karoon Gas Australia

Roger Mason BSc (Hons) MAusIMM - Managing Director

- Geologist with 25 years resources industry experience involving mining, project, exploration and business development roles covering a range of commodities. Australian and overseas experience including Africa and North America. Former General Manager Geology for LionOre/Norilsk Nickel Australia

Mark Rodda BA, LLB - Non-Executive Director

- Lawyer with 16 years private practice, in-house legal, corporate secretary and consultancy experience. Former General Counsel and Corporate Secretary for the LionOre Mining. Experience in the management of acquisitions, financings and restructuring initiatives. Non-Executive director of Coalspur Mines

Peter Buck MSc, MAusIMM - Non-Executive Director

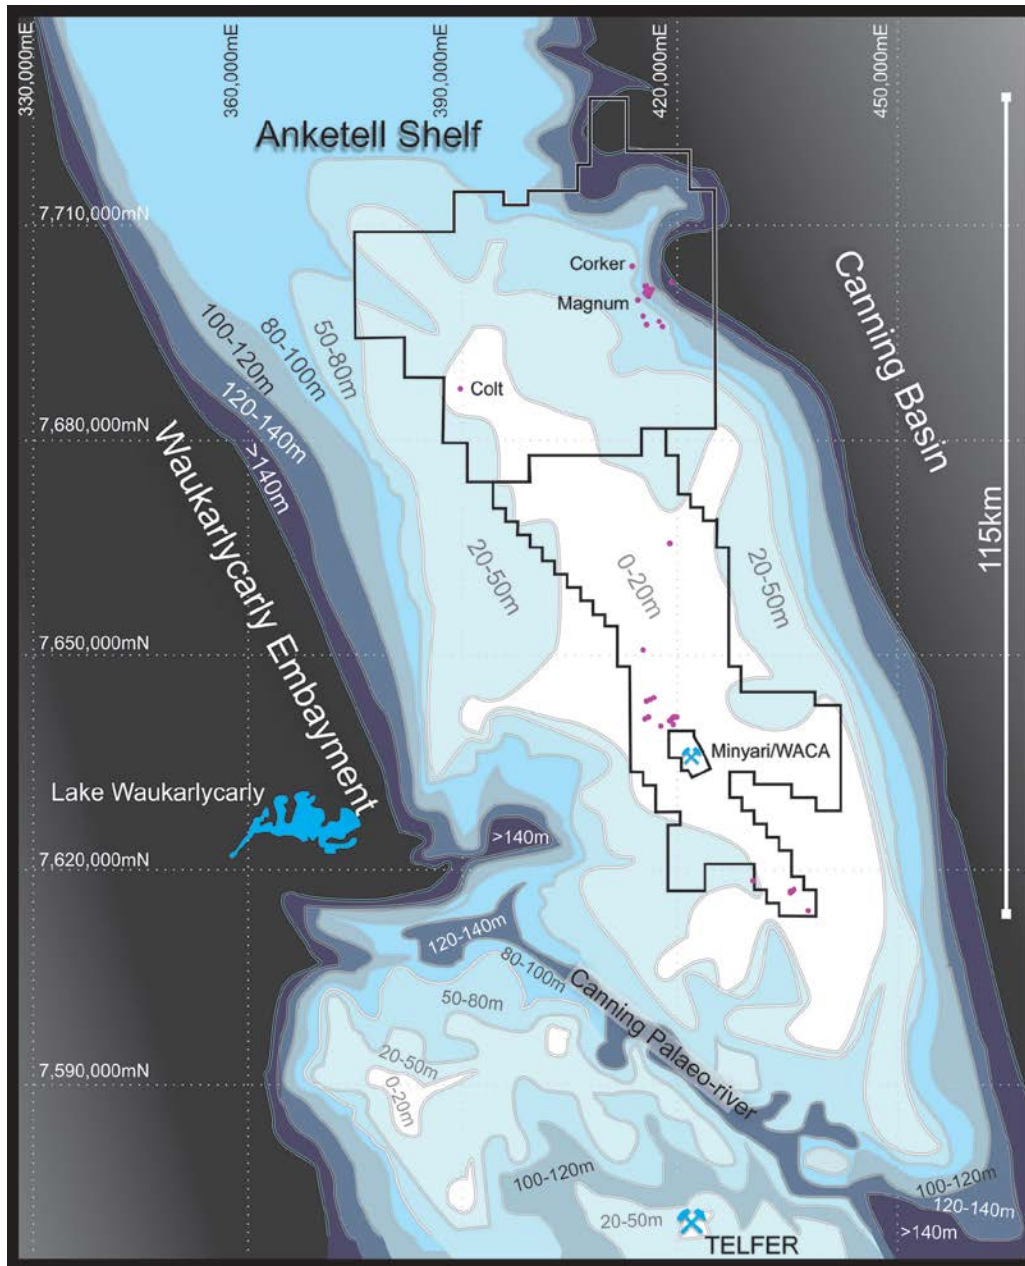

- Geologist with 36 years international exploration and production experience. Associated with the discovery and development of a number of mineral deposits in Australia and Brazil. Former Director - Exploration and Geology for LionOre Australia. Previous board positions with Gallery Gold and Breakaway Resources. Chairman of PMI Gold

Gary Johnson MAusIMM, MTMS, MAICD - Non-Executive Director

- Mining executive with 31 years experience as metallurgist, Manager, Owner, Director and Managing Director. Former Managing Director of Norilsk Nickel Australia, director of Tati Nickel and WMT, which developed and commercialised the Activox technology. Principal of Strategic Metallurgy and Non-Executive director of Hard Creek Nickel Corp

Antipa's Big Assets

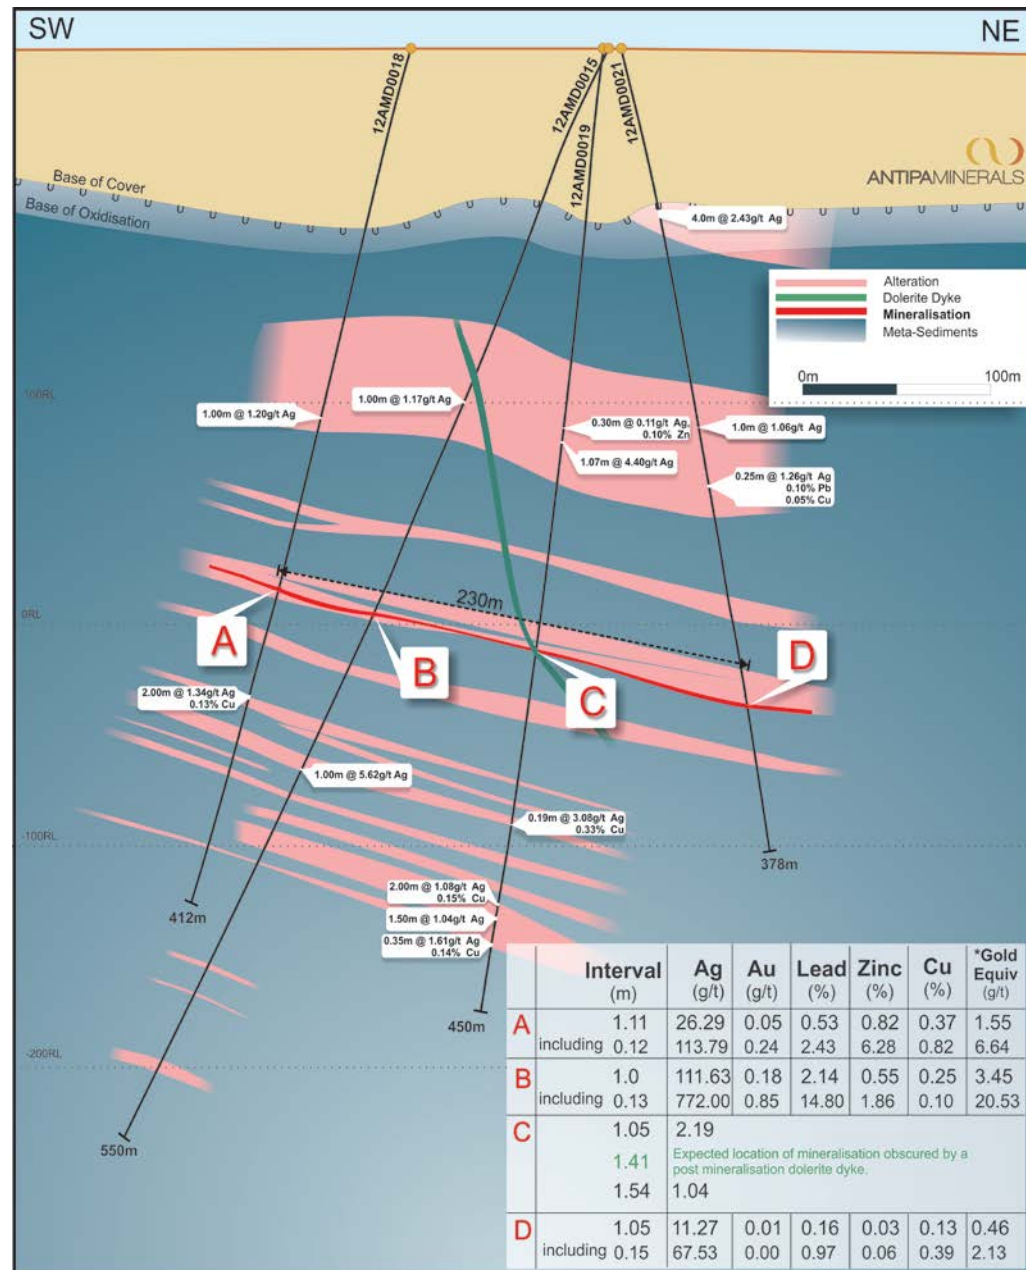

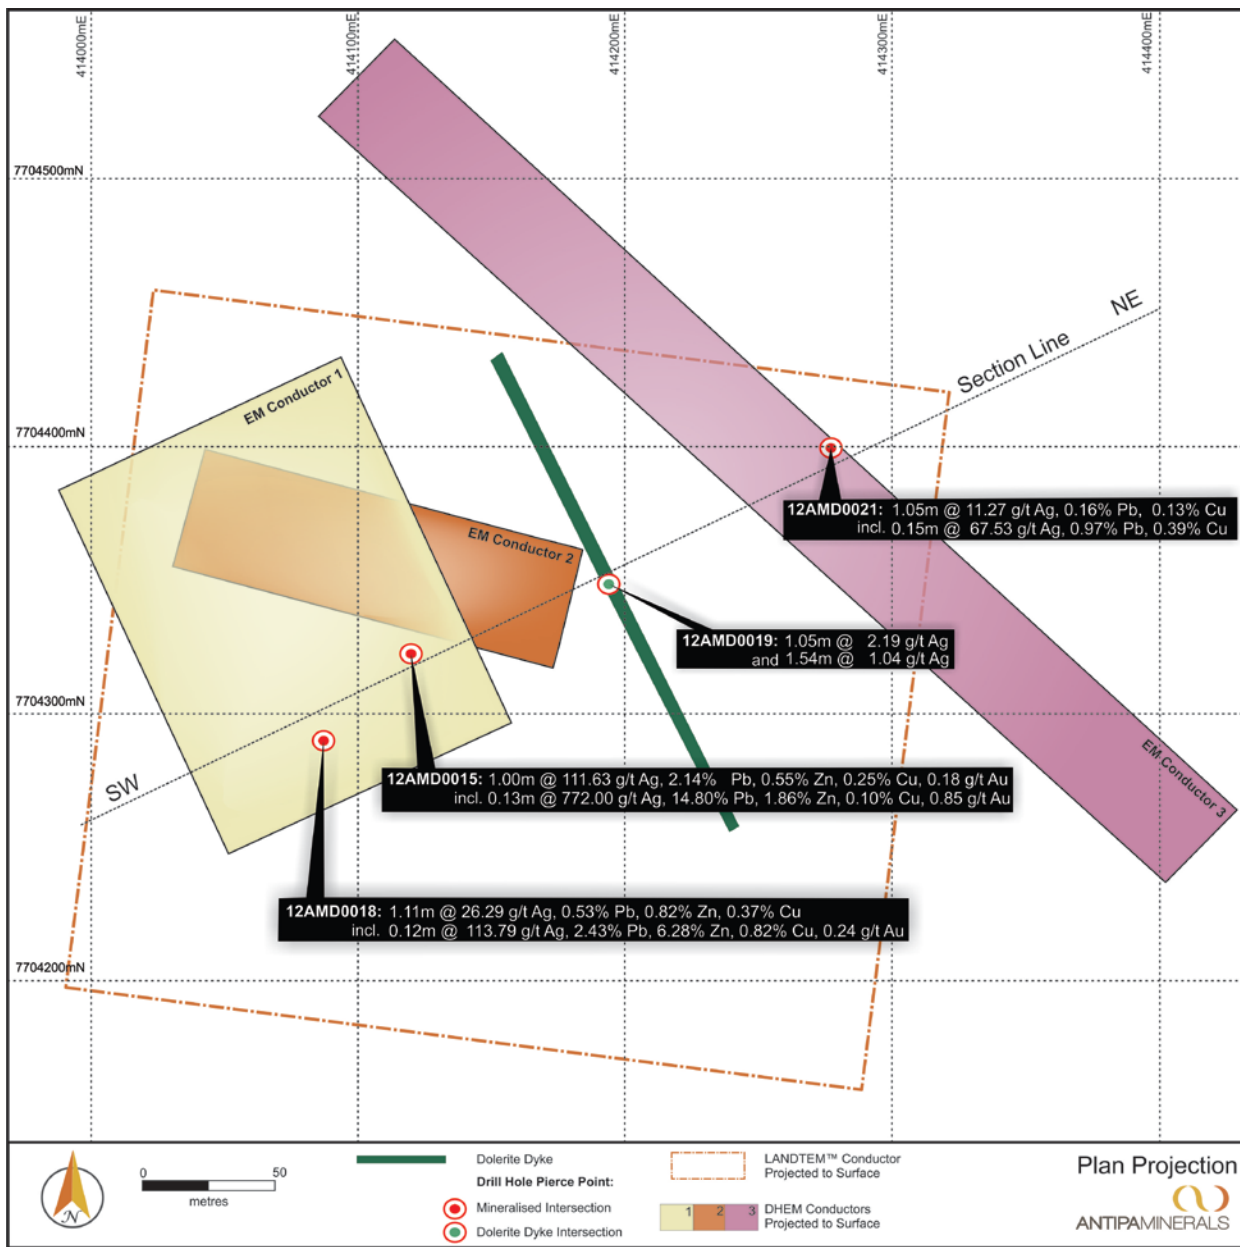

- Grossly under explored highly prospective region located in a politically stable jurisdiction
- Multiple commodity targets
- Highly endowed: Hosts world-class gold, copper, tungsten and base metal deposits
- Unaware of any other mineral province in the world hosting a 26Moz gold deposit in the absence of any other significant gold deposits
- No modern (geophysical) exploration techniques ever applied
- Limited drillholes deeper >100m into basement
- Big opportunity Preservation!

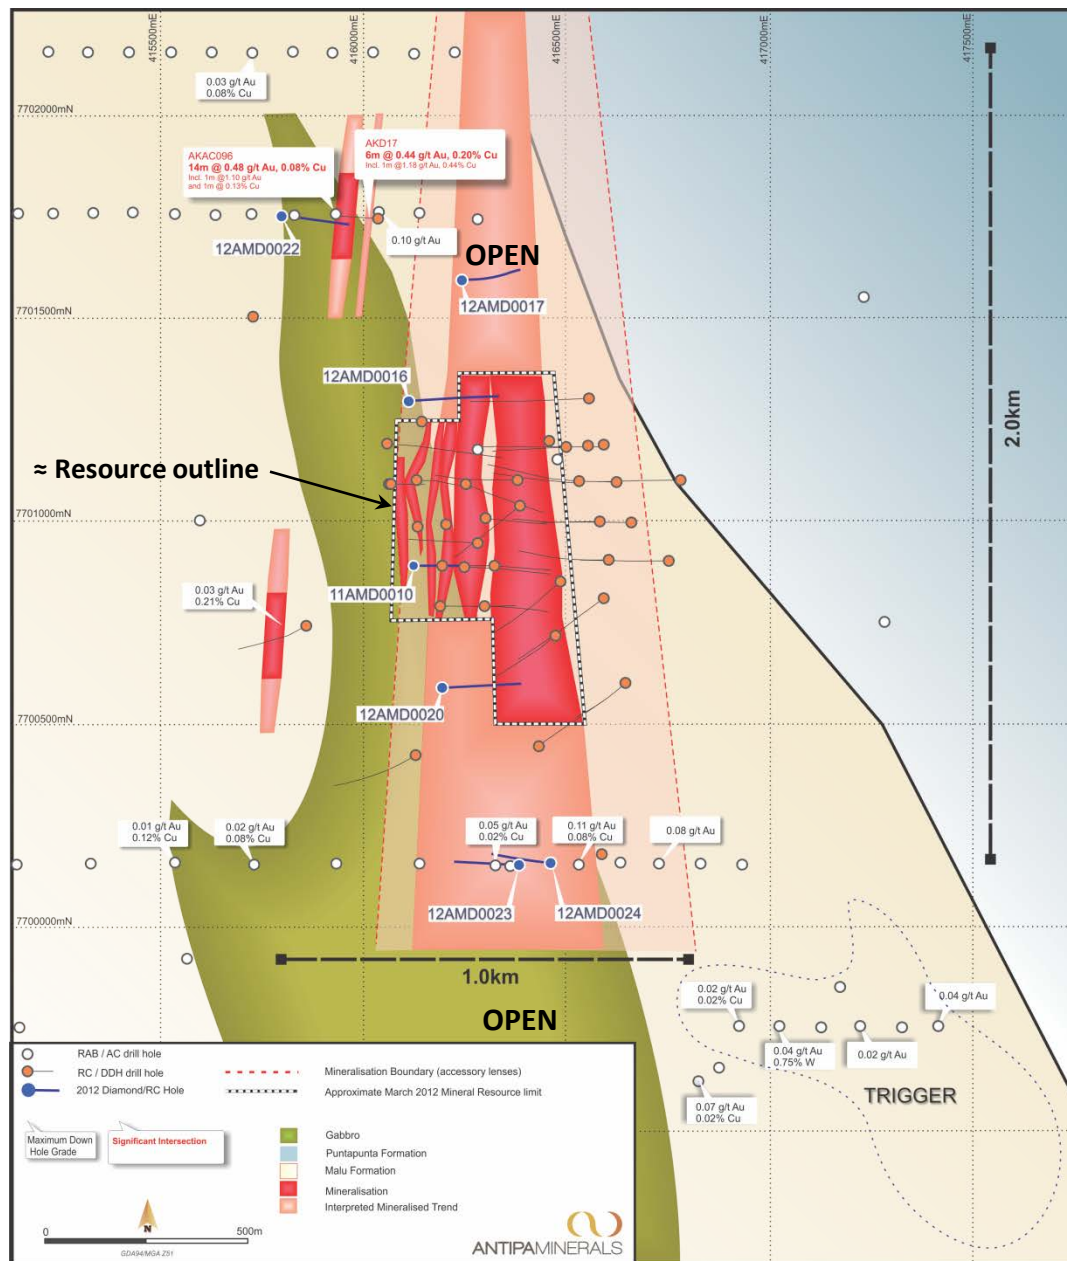

Corker Prospect - Opportunity Knocks

- Located < 4km north-northwest of Magnum
- Greenfield WA Antipa high-grade silver-lead-zinc-copper-gold discovery
- 2011 VTEM helicopter survey bulls-eye late-time EM conductivity anomaly
- First Corker drillhole intersects bonanza grade poly metallic mineralisation (up to 21 g/t gold equivalent) – May 2012
- Mineralisation 230m across
- Open in all directions!
- Mineralisation is high dollar value per tonne (NB: 1% Lead ≈ 57 g/t silver)
- Insufficient sulphides intersected to explain the EM conductivity anomalies
- Tail of the Tiger!

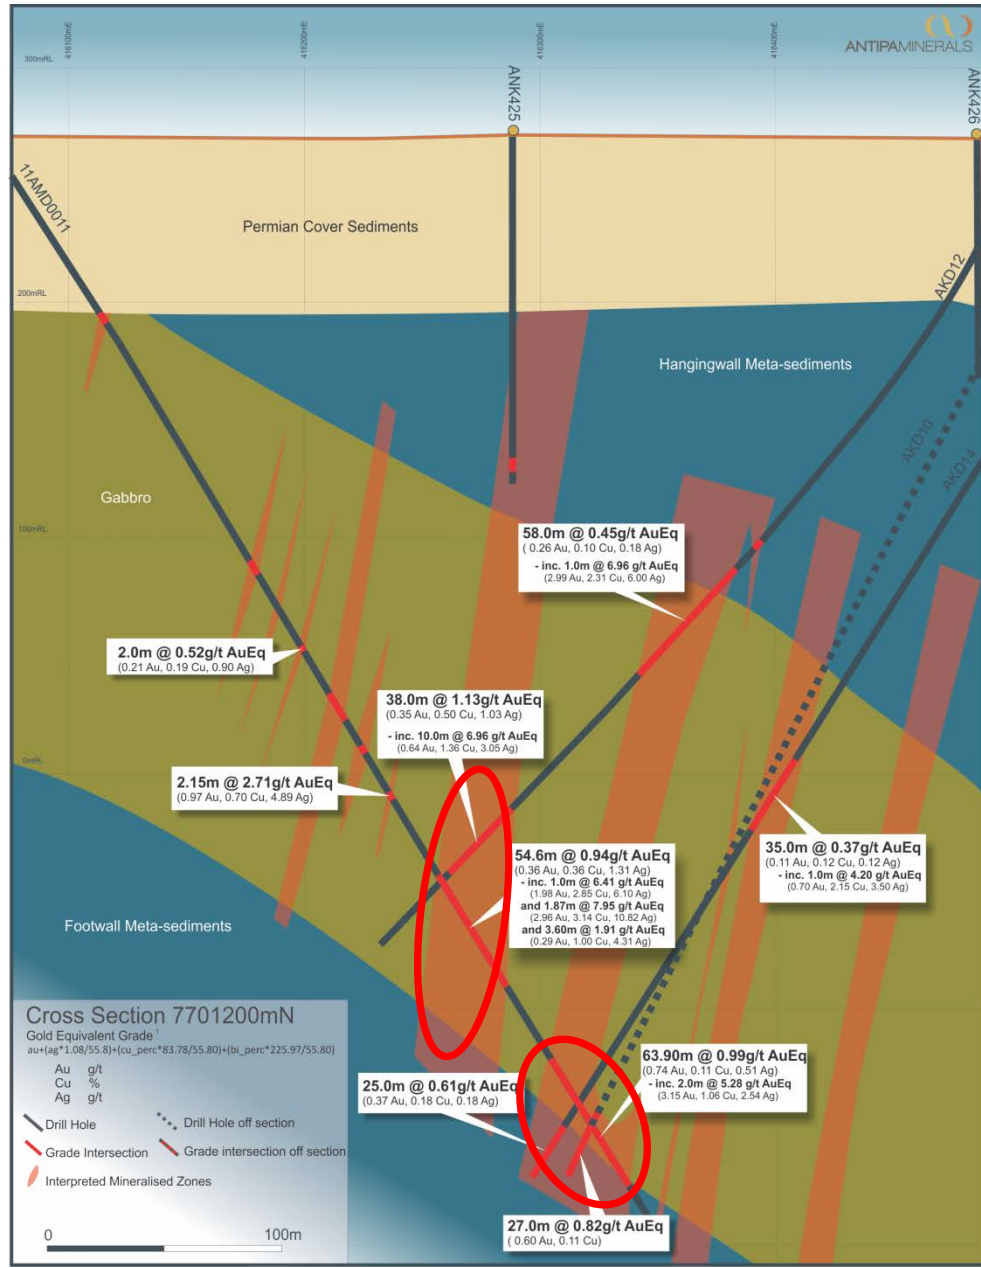

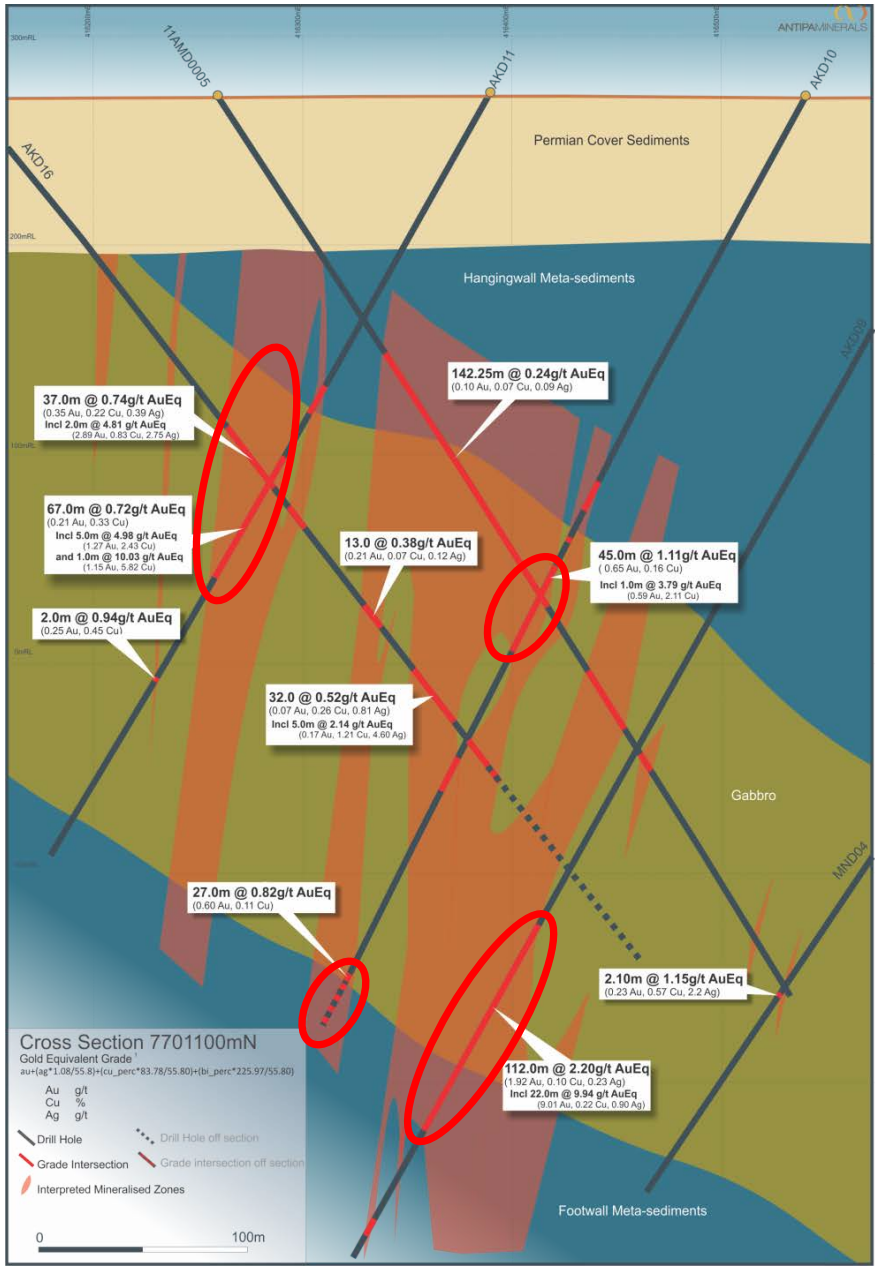

- DHEM Anomalies largely untested
- “Conductor 3” a text book off-hole conductor; untested!
- Planned drilling to target thicker sulphide positions
- Due to Corker’s polymetallic high-grades semi-massive sulphide mineralisation thicknesses > 1 to several metres potentially economic

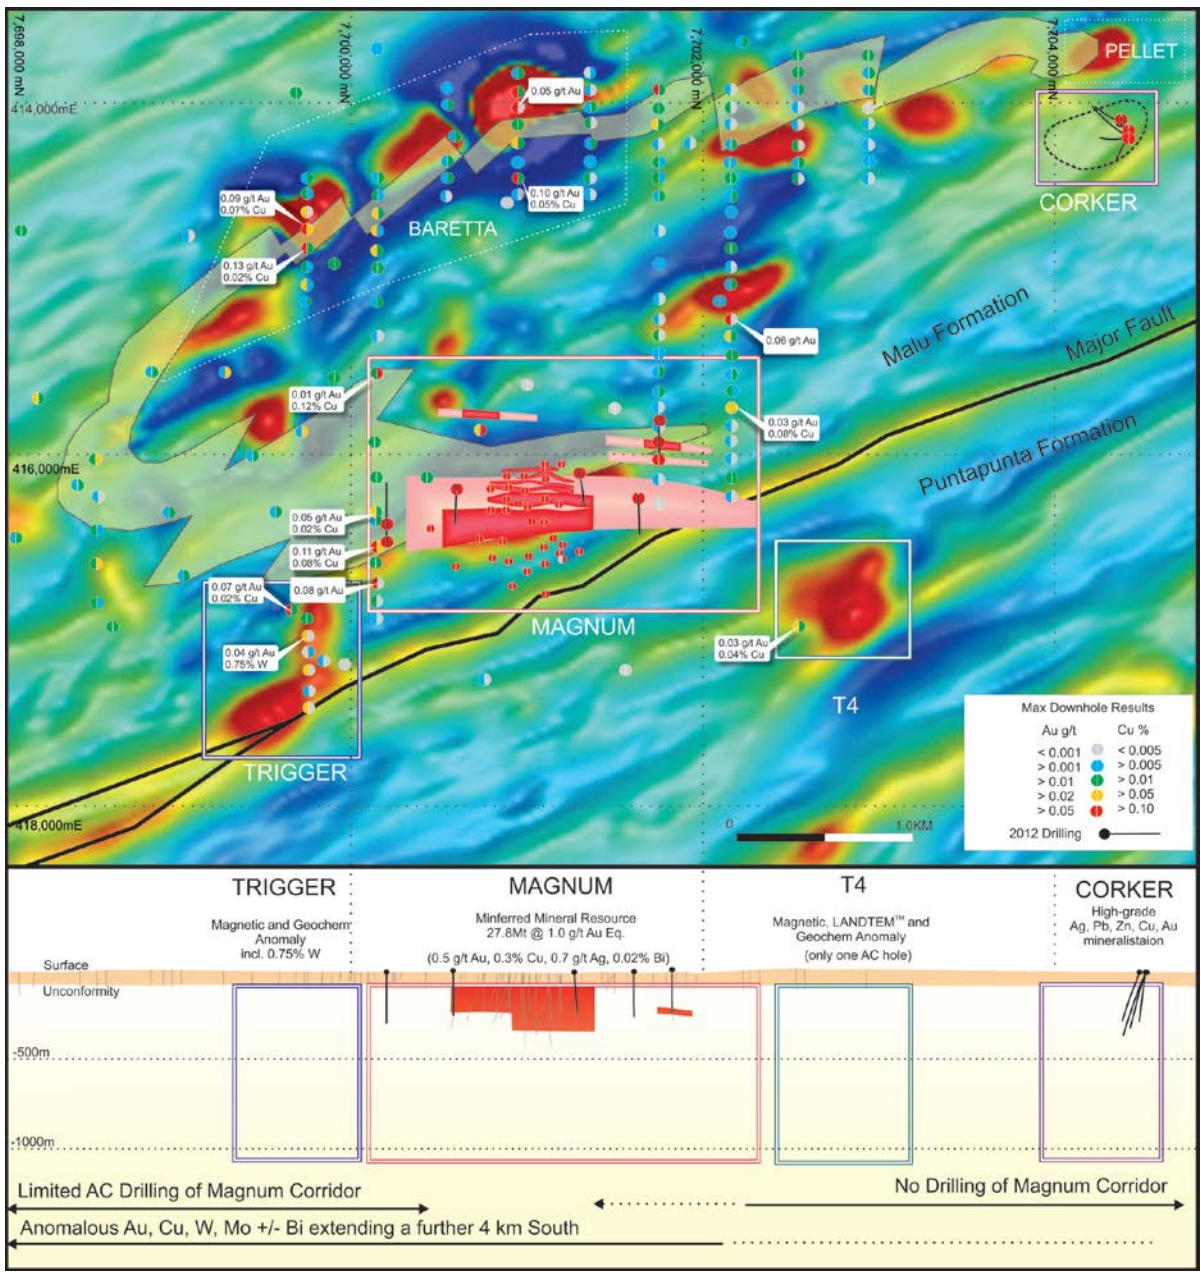

- Gold-Copper-Silver system 2km long x 600m wide x 600m deep and open in all directions
- A significant low-grade, high tonnage gold-copper-silver Mineral Resource
- 27.8 million tonnes at 0.5 g/t gold, 0.3% copper and 0.7 g/t silver
- Contained metal 415,000 oz gold, 77,000t copper and 641,000 oz silver (at a 0.3 g/t gold equivalent lower cut-off grade)
- Hosts higher-grade gold and copper lenses/shoots
- Broad spaced drilling
- Significant exploration upside!

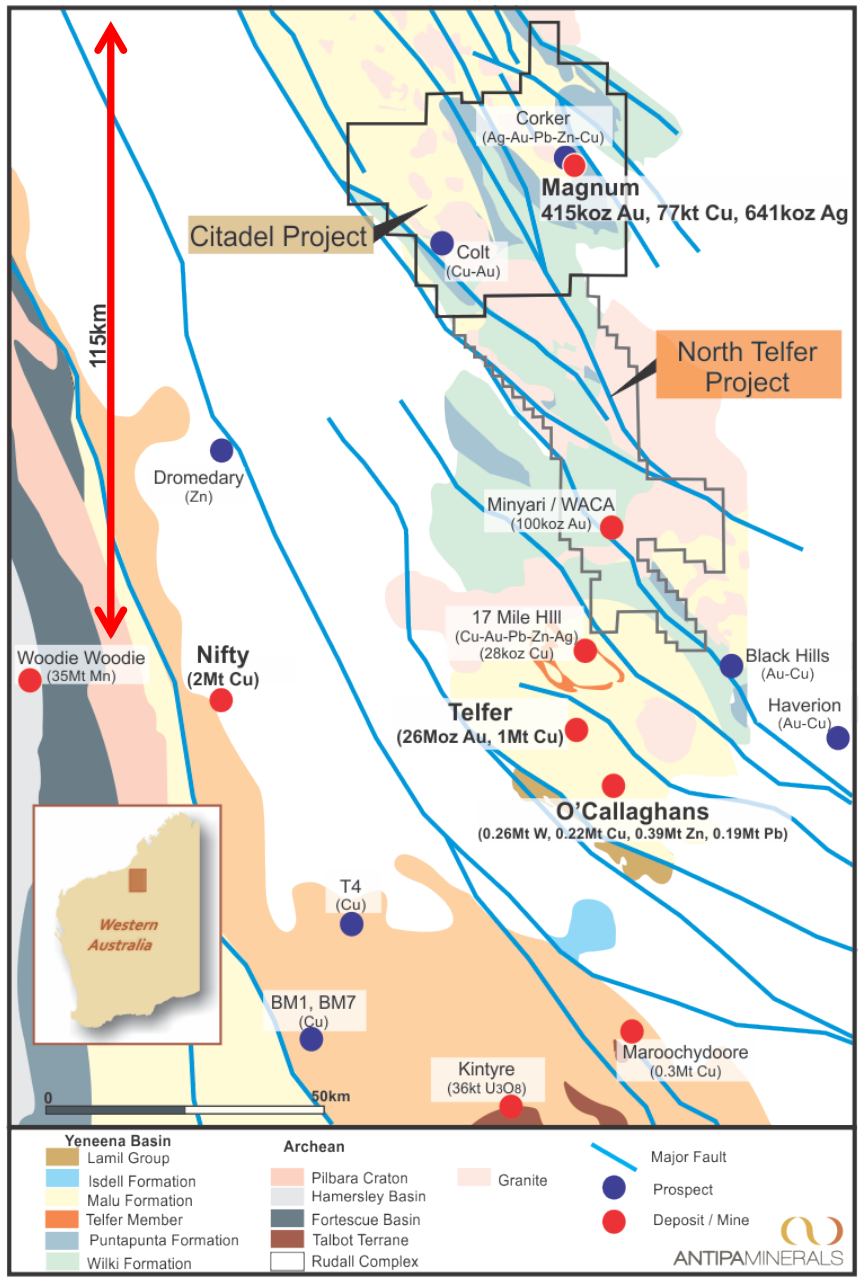

Magnum Prospect - Potential Growing

Magnum Dome – Quality Targets Identified

- Regional Magnum Structural Corridor highly prospective
- Several quality targets within 1 - 2 km of Magnum and Corker virtually untested:
 - Magnum extensions – Mineralisation open in all directions
 - Trigger – Magnetic + aircore anomaly (up to 0.75% tungsten)
 - Pellet – Magnetic anomaly 400m west of Corker
 - T4 - Magnetic + aircore anomaly
 - Beretta - Magnetic + aircore anomalies
- VTEM coverage only 25% of the 1,700km² Citadel Project and <15% of the combined 3,000km² project

- Abuts the southern boundary of the Citadel Project
- Extends contiguous tenement holding from 55 to 115km north to south
- Greater than 95% of the North Telfer Project area is concealed beneath younger cover just 1 to 40m deep
- All the key elements for hosting massive gold, base metal and tungsten deposits within Project
- North Telfer Project is in application stage and provides additional long term exploration upside

- Experienced and dedicated team with proven track record
- Exploring for big mineral deposits
- Largest granted tenement holder in the highly prospective, under-explored Paterson Province
- Proof of exploration concept and strategy – still early days
- First mover advantage (new generation geophysics)

ANTIPAMINERALS

BACKGROUND INFORMATION

Magnum Deposit - Inferred Mineral Resource Statement March 2012

	Mt	Gold g/t	Copper %	Silver g/t	Bismuth %	Gold Eq¹ g/t
Transitional	4.5	0.4	0.2	0.4	0.02	0.8
Primary	23.3	0.5	0.3	0.8	0.02	1.0
Total	27.8	0.5	0.3	0.7	0.02	1.0

	Gold Ounces	Copper Tonnes	Silver Ounces	Bismuth Tonnes	Gold Eq¹ Ounces
Metal	415,000	77,000	641,000	6,400	880,000

(0.3 g/t gold equivalent lower cut-off grade)

Competent Persons Statement

- The reported Magnum Deposit Mineral Resource has been compiled by Mr Patrick Adams, who is a Member of the Australasian Institute of Mining and Metallurgy and a full-time employee of Cube Consulting Pty Ltd. He has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the December 2004 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (JORC Code). Mr Adams consents to the inclusion in the report of the matters based upon his information in the form and context in which it appears.

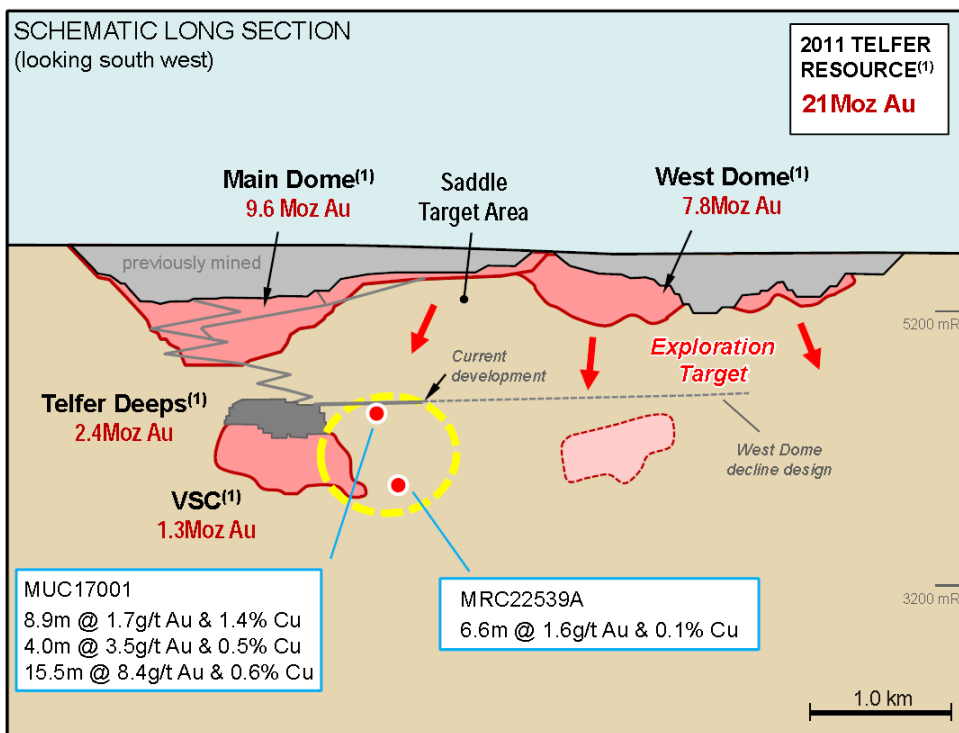

Gold Equivalent for Mineral Resource

- Gold equivalent grade (Gold Eq g/t) is based on the following USD metal prices:
 - \$1,735.70/oz Au, \$3.80/lb Cu, \$33.56/oz Ag and \$10.25/lb Bi (20/02/2012 commodity prices)
- Using the following formula:
 - Gold equivalent grade = Au (g/t) + %Cu x (83.78/55.80) + Ag (g/t) x (1.08/55.80) + %Bi x (225.97/55.80)
 - Grades have not been adjusted for the metallurgical or refining recoveries

- Abundant zones of quartz-sulphide veining, breccias ± matrix and disseminated Cu-Au-Ag mineralisation over a very large volume

- Telfer Mine – Australia’s 3rd largest 2011 gold producer (2nd largest in 2010)
 - 621 koz gold and 32 kt copper p.a. at 0.9 g/t gold and 0.1% copper (and 373 koz silver)
- Pre-mining 26 Moz gold and 1 Mt copper resource
- Mineral Resource (Dec 2011) of 1.13 Billion tonnes @ 0.58 g/t gold and 0.08% copper
 - 21 Moz gold and 925 kt copper
- Ore Reserve (Dec 2011) of 485 Mt @ 0.76 g/t gold and 0.10% copper
 - 11.7 Moz gold and 488 kt copper
- Outstanding remaining exploration potential

- O’Callaghan’s is a large, flat, laterally extensive polymetallic skarn deposit 10km south of Telfer
- Blind discovery – 350m below surface; Magnetics + EM + Geochem
- Inferred Mineral Resource (Dec 2011)
 - 78 Mt @ 0.33% WO₃ + 0.50% Zinc + 0.29% Copper + 0.25% Lead (i.e. 260,000 t WO₃ + 390,000 t Zn + 220,000 t Cu + 190,000 t Pb)
- World Class - Estimated to contain 6.4% of the World’s and 44% of Australia’s tungsten Resources
- Anticipated annual tungsten production to be twice the size of any mine in production during 2008
